Ride the Bikeway through Celery Flats Historic Area.

## Portage Bikeway Trail System

The nationally-recognized Portage Bikeway Trail System has long contributed to the quality of life in the city of Portage. The city has been steadily developing its multi-use trail system since 1987, which now includes a total of 20 miles of asphalt trails and close to 56 miles of paved bike shoulders. The trails were developed with accessibility in mind, making a ride on the trail a fun and enjoyable activity for people of all abilities.

The main spine of the trail system runs 7 miles from the Kilgore Road Trailhead to the Osterhout Avenue Trailhead, meandering along Portage Creek and through the Celery Flats Historical Area north of City Hall. The trail is 12 feet wide, nicely landscaped and well maintained.

In 2016, a new southern stretch of trail was opened, weaving its way through Eliason Nature Preserve. We saw whitetail deer and wild turkey in this wooded section. In 2020, another 1.1 miles of trail was added along Portage Road.
